

Report Identification Number: RO-22-020

Prepared by: New York State Office of Children & Family Services

Issue Date: Dec 23, 2022

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 1 month(s)

Jurisdiction: Wayne
Gender: Male

Date of Death: 07/13/2022
Initial Date OCFS Notified: 07/13/2022

Presenting Information

Wayne County Department of Social Services (WCDSS) received an SCR report which alleged the mother (SM) placed the 6-week-old subject child (SC) on an adult bed for a nap and left the room. The mother returned approximately one hour later and found the child face down and unresponsive. The mother began to administer CPR and called 911. The child was transported to the hospital by ambulance where he was pronounced dead. There were no physical signs of abuse or trauma present, and the child was alleged to be otherwise healthy. The father (BF), 7-year-old, and 5-year-old siblings (SSs) had unknown roles.

Executive Summary

This report concerns the death of a 6-week-old child which occurred while in the care of his mother. WCDSS received the SCR report and coordinated their response with law enforcement, who had already completed their preliminary investigation at the time the report was received by WCDSS.

WCDSS interviewed the mother and father in the home. The mother stated she had been asleep in bed with the child until approximately 8:30 AM, when she got out of bed to get the 7-year-old sibling on the bus for school. The mother stated she left the room with the child on top of the adult bed and laying on his stomach. The mother stated she then fed the 5-year-old sibling breakfast, took a shower, and bathed the 5-year-old sibling. The mother stated she checked on the child at approximately 9:30 AM and he was breathing and was asleep at that time. The mother stated she returned to the bedroom at 10:30 AM and found the child unresponsive. The mother began CPR immediately and called 911. The child was transported by ambulance to the hospital where he was later pronounced dead. The father was at work at the time of the fatal incident. The siblings were assessed as safe in the care of the mother and father.

WCDSS spoke with law enforcement who did not suspect any criminality in the child's death. The medical examiner stated the autopsy showed no signs of abuse or trauma, though the final report might not be available for up to a year from the exam. WCDSS requested these records be provided upon their release.

WCDSS offered services to the family in relation to the child's death. The services were accepted and a referral for counseling was made. The investigation remained open at the time this report was written.

PIP Requirement

WCDSS will submit a PIP to the Rochester Regional Office within 30 days of receipt of this report. The PIP will identify action(s) WCDSS has taken, or will take, to address the cited issue(s). For issues where a PIP is currently implemented, WCDSS will review the plan and revise as needed to address ongoing concerns.

LDSS Response

WCDSS received the SCR report, notified the DA, and coordinated their response with LE. LE informed WCDSS the SM placed the SC on the adult bed for a nap. The SM placed the SC on his stomach and left the room. Upon her return, the SM found the SC unresponsive, initiated CPR, and called 911. LE informed WCDSS they had conducted interviews with the family, did not suspect criminality, and WCDSS could speak to the family independently.

WCDSS interviewed the SM and BF in the home. The SM stated the SC did not sleep consistently the previous night and cluster fed throughout the night. The SM stated she slept with him in the living room to avoid waking the BF. The SM and BF stated the BF left for work at approximately 7:00 AM and the SM and SC moved from the living room to the bedroom where they co-slept until approximately 8:30 AM. The SM stated she awoke, got the 7-year-old SS on the bus for school, then fed the 5-year-old SS. The SM stated at approximately 9:30 AM, she took a shower. The SM stated she had checked on the SC prior to her shower, and he was breathing and asleep. The SM stated it was common for the SC to take a long

nap in the mornings, especially if he did not sleep or eat well the night before. The SM stated she then bathed the 5-year-old SS and returned to the bedroom at approximately 10:30 AM to check on the SC and found him unresponsive. The SM confirmed she placed the SC on his stomach and stated their pediatrician told them they could place the SC to sleep on his stomach. The parents stated they had knowledge of safe sleep practices. The SSs were interviewed and expressed no knowledge of the fatal incident other than the SC had passed away. The SSs were assessed as safe in the care of the SM and BF. WCDSS offered the family services in relation to the death of the SC and the family accepted counseling services.

WCDSS interviewed the SC's pediatrician and obtained the treatment records for the SC and SSs. The pediatrician identified no historical concerns for the care of the SC. The pediatrician was asked directly about telling the parents they could put the baby on their stomach to sleep. The pediatrician denied this and stated he informed the parents they could place the SC on his stomach during supervised activity time. No concerns were identified for the SSs in the treatment records.

WCDSS interviewed the ME. The ME informed WCDSS there were no signs of abuse or trauma present in the autopsy, though the results of the autopsy would not be available for up to a year. The records were requested upon their release by WCDSS.

WCDSS made referrals for counseling services at the request of the family. The case record was unclear if the services had been utilized and the investigation remained open at the time this report was written, pending the final autopsy results.
