

Report Identification Number: SY-19-024

Prepared by: New York State Office of Children & Family Services

Issue Date: Oct 09, 2019

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 1 month(s)

Jurisdiction: Onondaga
Gender: Male

Date of Death: 05/17/2019
Initial Date OCFS Notified: 05/20/2019

Presenting Information

An SCR report alleged that on 5/17/19, the 5-week-old male child passed away while in the care of the mother and the father. The child was transported to the hospital at 2:00 AM and was unresponsive upon arrival. The child was pronounced deceased at 4:37 AM and had no physical signs of trauma. Further details about the child death were unknown.

Executive Summary

This report concerns the death of a 1-month-old male subject child; this child had a twin brother. Onondaga County Department of Social Services (OCDSS) received an SCR report on 5/17/19 regarding the death of the subject child. On 5/17/19, the twins were placed in separate portable cribs to sleep at 2:30 AM. The father woke to the twin crying. The father checked on the twins and found the subject child on his back unresponsive and called 911. The 911 call was placed at 3:39 AM; however, due to a language barrier, the 911 operator was not able to provide the father with instructions on how to administer CPR even after enlisting the help of an interpreter. EMS arrived and started CPR and the subject child was transported to the hospital where he was pronounced deceased at 4:37 AM.

OCDSS assessed the safety of the twin, and the 8-year-old and 5-year-old surviving siblings. There were no noted safety concerns for their care. The twin's portable crib was observed and safe sleep was discussed. There were no concerns for the twin's care.

The medical examiner's final autopsy report was received and the cause of death and manner of death were undetermined. There were no physical signs of abuse or maltreatment of the subject child. Law enforcement investigated the fatality and concluded their investigation, finding no criminality involved in the death of the subject child.

OCDSS completed all safety assessments and required reports accurately and on time. OCDSS obtained information and records from medical, law enforcement, school, the visiting nurse and interviewed family members. There were no noted concerns about the care of the subject child or the surviving siblings by the parents.

OCDSS unsubstantiated the allegations of DOA/fatality and inadequate guardianship against the parents for the subject child. The parents were educated on safe sleep and the twins had their own portable cribs to sleep in. There was a blanket observed in each crib but the father denied the blanket was covering the subject child's face. It was also learned the visiting nurse had told the parents it was okay to have a blanket in the twin's cribs. The visiting nurse told OCDSS that she was aware of the blanket but believed it was okay and the parents were following safe sleep guidelines. OCDSS educated the visiting nurse and spoke with the nursing agency providing the services about safe sleep. OCDSS offered the parents referrals for bereavement services and they declined. OCDSS made several follow up visits and observed the twin's crib. The parents were following safe sleep guidelines. The visiting nursing service continued to work with the family and the parents had the support of family members. The case was unfounded and closed.

Findings Related to the CPS Investigation of the Fatality

Safety Assessment:

- Was sufficient information gathered to make the decision recorded on the:
 - Approved Initial Safety Assessment? Yes
 - Safety assessment due at the time of determination? Yes
- Was the safety decision on the approved Initial Safety Assessment appropriate? Yes

Determination:

- Was sufficient information gathered to make determination(s) for all allegations as well as any others identified in the course of the investigation? Yes, sufficient information was gathered to determine all allegations.
- Was the determination made by the district to unfound or indicate appropriate? Yes

Explain:

OCDSS gathered sufficient information in order to make a determination in this case.

Was the decision to close the case appropriate? Yes

Was casework activity commensurate with appropriate and relevant statutory or regulatory requirements? Yes

Was there sufficient documentation of supervisory consultation? Yes, the case record has detail of the consultation.

Explain:

The family was receiving community based services and continued to receive these services at the time of the case determination.

LDSS Response

On 5/17/19, OCDSS received the fatality report from the SCR. OCDSS coordinated with law enforcement, contacted the source, completed a CPS history check, notified the medical examiner's office and the district attorney's office of the death.

On 5/17/19, OCDSS went to the home to assess the safety of the surviving siblings; no safety concerns were noted. Upon arrival at the home OCDSS contacted the language line to assist them in speaking with the family. The parents were not at home at the time of the visit but the maternal grandmother and the maternal aunt were there caring for the surviving siblings. OCDSS received a tour of the home from the 8-year-old surviving sibling and observed two portable cribs for the twins. OCDSS found there to be a blanket in each portable crib and OCDSS explained to the maternal grandmother there should be no blankets in the crib. The maternal grandmother removed the blankets. OCDSS observed and spoke with the 8-year-old and the 5-year-old surviving siblings. The twin was observed in a swing and there were no noted safety concerns for the surviving siblings. OCDSS contacted the mother later the same day and went back to the home. The mother said the twins had been placed to sleep in each of their portable cribs at 2:30 AM. The father woke because the twin was crying. The father checked on the twins and the subject child was not breathing. The father called 911 and EMS arrived and transported the subject child to the hospital where he was pronounced deceased.

The visiting nurse arrived at the home while OCDSS was there and OCDSS spoke with the nurse. The nurse had no

concerns for the care the mother provided the twins. The nurse said the mother was aware of safe sleep and this had been discussed. OCDSS did interview the father and his statement was consistent with the mother's.

OCDSS offered the parents referrals for bereavement services. The parents denied drug/alcohol misuse and there was no evidence of alcohol or drugs found in the home at the time of the fatal incident.

OCDSS obtained information from law enforcement, the medical examiner, emergency services, the visiting nurse, school, medical records from the hospital and pediatrician. There were noted concerns for the care of the children by the parents.

OCDSS contacted the nursing agency and spoke with the visiting nurse's supervisor and discussed safe sleep. OCDSS made follow up visits to the home and observed the parents were providing a safe sleep environment for the twin.
